## The Corsair 24

The perfect weekend racer/cruiser, the Corsair 24 is compact, easily trailerable, and an amazing combination of performance and practicality. The Corsair 24 is tough, lightweight, sporty, exceptionally fast, responsive and safe to sail. Based on simple and original concepts, well-proven over many years, the Corsair 24 also incorporates innovative features and refinements that make it especially exciting and fun, as well as affordable to own.

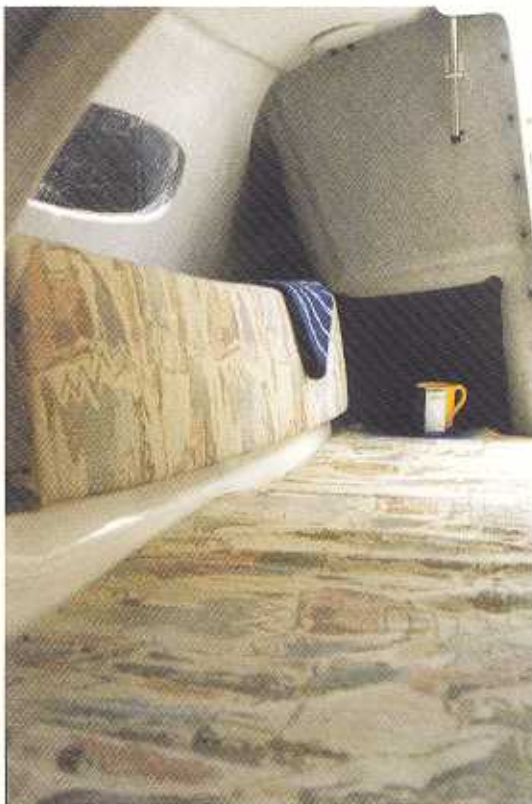

With its roomy cabin and optional cruising amenities, the Corsair 24 sport trimaran also becomes a highly mobile pocket cruiser. It is ideal for slipping away each weekend to all of the quiet coves and secluded inlets no one else can cruise to.

It's the Corsair 24's amazing performance — with 20-knots-plus speed capability — that really sets the Corsair 24 apart. With the optional bowsprit installed, the Corsair 24 can fly an easy-to-handle asymmetrical spinnaker or screacher for exhilarating performance; when you really want to see what this little speed machine can do, join its active one-design racing fleet and buzz the buoys with ease and unbelievable acceleration. So well designed is the Corsair 24 that even in the toughest conditions you only need a crew of three (or less) to obtain top racing performance.

The cozy interior comfortably sleeps four, and optional head, sink and alcohol stove provide pleasant livability. Spacious decks and nets give everyone plenty of room to crew efficiently or spread out peacefully. The Corsair 24 is performance perfection and the perfect family sport boat.
